LeetCode
DOB: 26 July 2003

CAREER OBJECTIVE

- Aspiring Software Engineer with strong problem-solving and programming skills, seeking an opportunity to contribute to innovative software solutions in a reputed multinational company. Passionate about software development, continuous learning, and building scalable real-world applications.

EDUCATION

- MTech - Artificial Intelligence and Machine Learning** 2025 - 2027
Anil Neerukonda Institute of Technology and Sciences, Visakhapatnam CGPA: 8.78
- BTech - Electrical and Electronics Engineering** 2022 - 2025
Sri Venkatesa Perumal College of Engineering and Technology, Puttur CGPA: 8.34
- Diploma - Electrical and Electronics Engineering** 2019 - 2022
MRAGR Govt.Polytechnic College, Vizianagaram Percentage: 70%
- High School** 2018 - 2019
Fort City School, Vizianagaram CGPA: 9.8

SKILLS

- Programming Languages :** Python, Java, C Programming
- Web Development :** HTML, CSS, JavaScript, React, Django
- Database and Data Tools :** MySQL, Power BI
- Machine Learning :** Machine Learning Basics
- Developer Tools :** Git, VS Code, Android Studio, PyCharm
- Core CS Concepts :** DSA, OOPs, DBMS, Operating Systems, Computer Networks

WORK EXPERIENCE

- Palle Technologies - Python Full Stack Trainee (Offline)** Feb 2025 – July 2025
Completed hands-on training in Python Full Stack Development with exposure to software development and testing workflows.
- Worked on real-time projects as part of the internship.
- Infosys SpringBoard - Path to Future Intern (Online)** Feb 2025 – April 2025
Developed an advanced image recognition model, achieving 85% accuracy in initial testing.

PROJECTS

- Advanced Face Recognition System** Developed a real-time face recognition authentication system that uses live webcam input for secure, contactless user login, supporting both user and admin roles with dashboard access and activity tracking.
Tools: React.js, Flask, Socket.IO, OpenCV and deep learning face recognition libraries, and SQLite.
Contributing to a seamless, secure, and responsive login experience.
Role: Designed and implemented the User interface, integrated webcam streaming and authentication logic using Flask and Socket.IO.
- E-Commerce with AI (Ongoing)** Developing an AI-powered feature for an Amazon-like e-commerce platform to enhance personalized shopping experiences through AI-driven body analysis and smart clothing recommendations. Aims to improve recommendation accuracy and reduce product return rates by providing better outfit fitting and visualization based on user body type.
Technologies: HTML, CSS, JavaScript, Python, Open CV, SMPLX Models(3-D Modeling).
Role: Designed and developed core application features from scratch.

ACHIEVEMENTS

- LeetCode : Solved 400+ DSA problems across Arrays, Graphs, DP, and Trees.
- Achieved 1100+ Subscribers during YouTube journey.
